IDENTIFIERS Bureau of Indian Affairs Schools; *South Dakota

ABSTRACT

These two reports present statistical information on South Dakota public, Bureau of Indian Affairs (BIA), and private school libraries for the 1986-87 and 1987-88 school years. Data in the following areas are included for both years: enrollment served, total circulation, circulation per capita, book circulation, circulation per volume, interlibrary loan requests, librarian hours per week, hours open per week, total volumes, volumes added, periodical subscriptions, audiovisual materials, adult staff, student assistants, and square footage. The 1987-88 survey also includes information on board-adopted materials selection policies and the availability of interlibrary loan, bibliography, public use, and audiovisual production services. The final section of each report presents financial data on public school libraries: total district expenditures; total library/media expenditure; percentage of budget spent for library/media services; salaries; materials and supplies; purchased services; operating expenditures per capita; library materials per capita, and capital expenditures. Major findings are summarized in the introduction. (MES)

INTRODUCTION

The statistical reports from school libraries in South Dakota have been compiled for the school year of 1986-87. This publication is the primary outcome of that effort, however the statistical information submitted by librarians is used each year to respond to a variety of requests for information about school libraries in the state. A "thank you" goes to each librarian who takes time from their busy schedule to return the report in a timely manner.

The information provided in this document is only as good as that supplied in the report forms. Due to an idiosyncrasy in the computer program, it is not possible to indicate estimations in the final report. The reader may assume that round numbers are probably estimates. Examples might include a total circulation of 10,000 items, or a library where the total volumes and total book circulation are exactly equal.

MAJOR FINDINGS

South Dakota school libraries continue to be busy places, with the average library circulating 11,301 items in 1986-87; however this is a decline from 1985-86 of 6.1%. The total size of book collections remained almost the same with 7,047 volumes in 1986-87, an increase of only 1% from 1986. The number of volumes added to the average collection declined by 1.7% to 284 items. The number of periodical subscriptions remained unchanged from 1986 with the average library receiving 41 titles. The size of audiovisual software collections declined by 15% to 1,023 items. This change may be accounted for by just a few libraries who noted that this material had been removed from the libraries and put into classrooms. Finally, the size of the average library continued to shrink, declining by 4.3% to 1,618 square feet. The average audiovisual area also declined by 11.9% to 250 square feet. The accuracy of information regarding average size is very difficult to determine. Many (perhaps a majority) of the reports do not provide a separate response for square footage of audiovisual areas, but say something like "included in library". The reality may be that the libraries are smaller than is indicated and audiovisual areas are larger.

FINANCIAL DATA

The information in this section is compiled from the annual reports submitted by business managers of public school districts to the Division of Education on their annual report forms. This information is not readily available for private or BIA schools. The following notes are intended to explain the categories used in this section of the document.

Total district expenditure = the district's total operating expenditure for the school year 1986-87.

Total library/media expenditure includes all expenses related to the library/media program (salaries, benefits, materials, special services, capital expenditure etc.).

The third column provides a percentage of the districts total budget that is spent for library/media services. In 1986-87, this ranged from .06% at Oldham to 4.95% at Douglas.

Salaries = wages, excluding benefits.

Materials and supplies = print and nonprint materials and supplies purchased for the library/media center.

Purchased services = contractual services, cleaning, repair and maintenance of equipment, purchase of professional and/or technical services.

Operating expenditures per capita = the average cost per student for library/media services.

Library materials per capita = the average amount each district spends per student to purchase print and nonprint materials. In 1986-87, this ranged between $0.00 in nine districts (may or may not be correct, this is what was reported) and $39.76 at Summit.

Capital expenditure = money spent to purchase new furnishings, equipment, remodeling etc.

Financial data . . . . . Page 56

INTRODUCTION

Statistical information for school libraries in South Dakota has been compiled for the school year of 1987-88. This publication is the primary result of that effort, although the information collected is used each year to respond to a variety of requests for information about school libraries in the state. "Thank you" to each librarian who takes time from his/her busy schedule to complete and return the report in a timely manner.

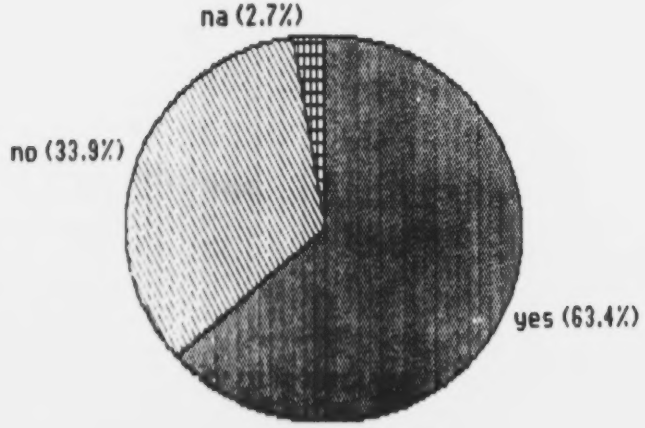
The information provided in this document is only as good as that supplied in the reports. Due to an idiosyncrasy in the computer program, it is not possible to indicate estimations in the final report. The reader may assume that round numbers are probably estimates. Examples might include a total circulation of 10,000 items, or a library where the total volumes and total book circulation are exactly equal.

MAJOR FINDINGS

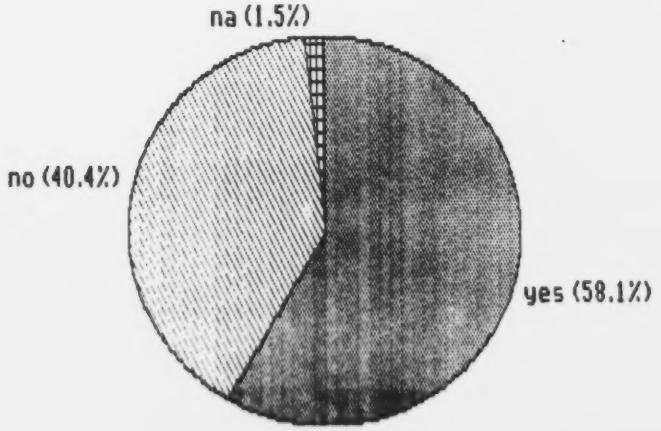
School libraries in South Dakota are busy places, with the average library circulating 11,459 items in 1987-88. This is a slight increase (1.3%) from 1986-87. The average total size of book collections remained almost unchanged with 7,059 volumes in 1987-88, compared with 7,047 volumes in 1986-87. The number of volumes added to the average collection increased by 19.5% to 353 items. The number of periodical subscriptions also increased slightly, with the average library receiving 42.5 titles in 1987-88, compared with 41 titles in 1986-87. The size of audiovisual software collections increased by 2.7% to 1,052 items. There were also slight gains in the physical size of library/media facilities. In 1987-88, the average library occupied 1,656 square feet, compared with 1,618 square feet in 1986-87. Audiovisual areas occupied 264 square feet in 1987-88, this compares to 250 square feet in 1986-87. It is difficult to determine the accuracy of information regarding physical space for libraries and media areas. Many (perhaps a majority) of the reports do not provide a separate response for square footage of audiovisual areas, but may say something like "included in library". The reality may be that libraries are smaller than indicated, and audiovisual areas are larger.

For the first time, an effort was made to include data concerning policies and services provided by school libraries. The results are represented by the following pie-graphs. On each graph, "na" is an indication of the libraries that did not answer that particular question. In general, the results were not a big surprise; except perhaps for bibliography service, where it was an unexpected finding that less than half of the libraries are providing this service.

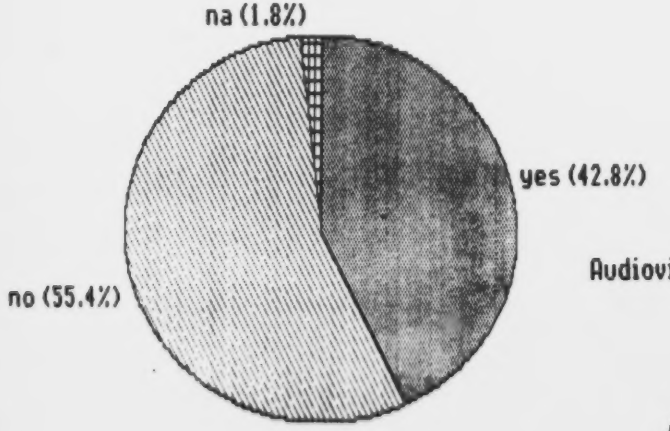
Board-adopted Materials Selection Policies



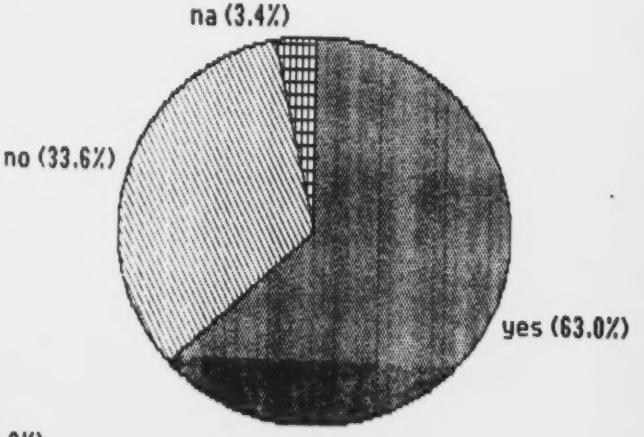
School Libraries That Provide Interlibrary Loan



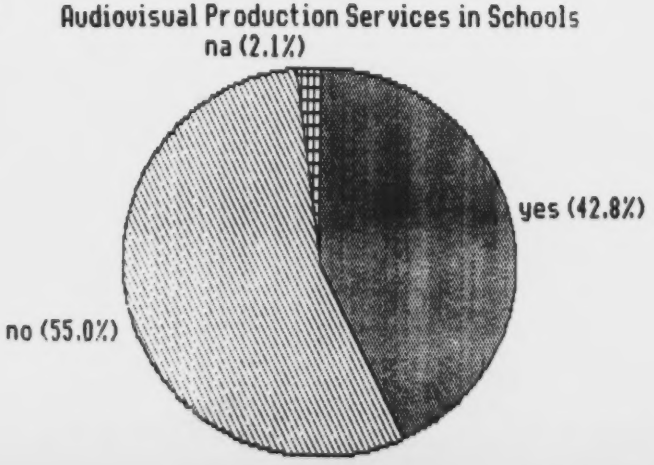
School Libraries That Prepare Bibliographies



School Libraries That Permit Public Use



Audiovisual Production Services in Schools



FINANCIAL DATA

The information in this section is compiled from the educational media section of the annual reports submitted by business managers of public school districts to the Division of Education. This information is not readily available for private or BIA schools. The following notes are intended to explain the categories used in this section of the document.

Total district expenditure = the district's total operating expenditure for the school year, 1987-88.

Total library/media expenditure includes all expenses related to the library/media program (salaries, benefits, materials, special services, capitol expenditure etc.).

The third column provides a percentage of the districts total budget that is spent for library/media services. In 1987-88, the ten districts with the highest percentage were (in rank order): Douglas, Jones Co., Polo, Bison, Florence, Tripp, Milbank, Waverly, Irene, and Plankinton.

Salaries = wages, excluding benefits.

Materials and supplies = print and nonprint materials and supplies purchased for the library/media center.

Purchased services = contractual services, cleaning, repair and maintenance of equipment, purchase of professional and/or technical services.

Operating experditures per capita = the average cost per student for library/media services.

Library materials per capita = the average amount each district spends per student to purchase print and nonprint materials. In 1987-88, this ranged between $0.00 in eleven districts (may or may not be correct, this is what was reported) and $59.31 at Florence.

Capital expenditure = money spent to purchase new furnishings, equipment, remodeling etc.
